

Industrial biotechnology is the application of biotechnology for industrial purposes. Our industrial biotechnology section, encompassing fields from microbiology, biochemistry and others, is dedicated to the use of microorganisms to produce useful enzymes for industrial applications and uses.

For consultation, kindly fill the form below.

Name *

Email *

Contact Number *

You are

☐ An Undergraduate Researcher

☐ A Postgraduate Diploma & Masters Degree Researcher

☐ A Doctoral & Post-Doctoral Researchers

Specific Interest with MicroBiotics *

☐ Generating Research Idea(s)

☐ Partnering on Researches Topic(s)

☐ Consultation on Research Issue(s)

☐ Developing Industrial Product(s)

Others not mentioned above

Specific Area(s) of Research under Industrial Biotechnology *

Brief and Detailed Explanation of Interest *

If you have a proposal or concept notes, kindly post here.

Affirmation: I solemnly promise that all information provided are true, free of plagiarism and not contravening any copyright laws *
